YOUR  
EXPECTATIONS  
HIGH!

WE'LL

MEET  
THEM  
GUARANTEED

8 ESSENTIALS

## INDIVIDUAL HEALTH RECORDS

Your baby has a history! The best medicine is prevention. Your 17 digit VIN number is as important as your Social Security number. By inspecting your vehicle with the "8 Essentials Checklist" and keeping records of your service history, mileage maintenance and recall updates, your level of empowerment skyrockets! Ensure you're up-to-date and that you're as safe as possible and prolong the life of your vehicle, all while saving you time and money.

### 1. DIGESTIVE SYSTEM

Fuel and energy is the food that makes your vehicle go. To keep your vehicle running healthy smooth. Know what your car eats. IT MATTERS! We check the health of your digestive system.

### 2. GOTTA HAVE HEART

You can't deny the MacDaddy of all hardworking electrical parts. One loose connection and you're dead. We check your battery, starting and charging system.

### 3. BRAIN & IMMUNE SYSTEM

Dash lights are like synapses in your brain telling you how your vehicle is feeling. Look at the colors of the icons on the dashboard. They're like those on a traffic light:

Green: Go baby, go!

Yellow: Budget! Have some money set aside for maintenance

Red: Full Stop! Something needs ASAP attention

### 4. CHECK YOUR RUBBER

Neglect will cause you to break down, get stuck on the road, waste your time and waste your money. Rubber is used to transport fluids to each system, and support structure of your vehicle. Being proactive offsets system failure. We check your rubbers.

Tires • Belts • Hoses • Boots • Bushing

### 5. RESPIRATORY SYSTEM

Have you ever ran a marathon while having an asthma attack? Every breath you take counts, and that philosophy carries over to your vehicle. If a filter is dirty, it puts a strain on the system it filters. We check your exhaust and filters.

Air • Cabin • Fuel • Oil • Transmission

### 6. SENSES AND SIGHT

Use your intuition and pay attention. 90% of accidents are caused by poor visibility. You need to see and others need to see you. We check to ensure you have a great sense of sight, smell, look & feel.

Tail Light • Brake Light • Windshield Wipers • Mirrors • Headlight & Lenses

### 7. REFLEXES

No matter how cat-like your reflexes are, if your vehicle's brakes aren't working properly, you're in trouble. We check your brakes, steering, front end and suspension to make sure your vehicle's reflexes are as good as yours are.

### 8. CIRCULATORY SYSTEM

Your circulatory system keeps blood pumping through your veins, like the fluids that run through the systems in your vehicle. We check your fluids.

Motor oil • Power Steering • Brake • Battery Coolant\* • Transmission • Washer
